

Putting the pieces together...

Helping Hand Resource Center's consultants are dedicated to help inform and educate families, professionals and self-help advocates in the overall process and options available for treatment.

This includes strategies for individuals with the behavior, movement, social, and communication challenges associated with autism.

Everyone who loves someone with a developmental delay /disability needs a helping hand.

So whether you are:

- An experienced parent who's already been working with a loved one for years
- A parent who just received a diagnosis for their family member
- Or a clinician needing a place to refer patients in need to...

Helping Hand Resource Center

Helping Hands...

Helping Hand Resource Center has been developed to assist patients and families with the "road to treatment".

Founder/Consultant, Ginger Sayre, has dedicated her knowledge and experience to help others.

Lives depend on treatment...

Insurance Assistance:

Helping Hands can assist patients and families to obtain reimbursement from their insurance company. Insurance companies tend to deny claims if the proper information is not provided. Although we can not guarantee reimbursement amounts, we have been successful with the claims in which we have submitted.

We are aware many families do not have the time or the knowledge to submit claims, therefore treatment becomes a financial stress on families and in most cases treatment is stopped due to funding. We look forward to helping so that treatment can continue.

Consultation for newly diagnosed families:

Many patients/parents are unaware of the treatment options available. Each and every treatment will vary depending on the diagnosis given. Depending on the diagnosis given we can assist you with the next step in treatment and create a plan of action.

We can assist you with which provider to contact first. We also can assist with diet plans and laboratory testing requirements for individual physicians.

Referrals to outside Providers:

Helping Hands works directly with a number of outside providers in which we can offer information and can assist with the referral and appointment process.

The list of providers in which we have a working relationship with consist of:

- Neurofeedback Providers
- Psychologist
- Gastroenterologist
- DAN physicians
- Hyperbaric Facilities
- Nutritionist
- Neurologist
- Immunologist
- ABA Providers
- Support Groups
- Pediatric Dentists
- Developmental Specialist
- Regional Centers
